**备注 (REMARKS)**

1. 电气参数和运行时的环境有关，以上数值仅为参考标准，来源于标准环境下的试验测试。  
(Electrical parameters measured under standard environment are for reference only, which are related with operation environment.)
2. 如参数有异常或偏差，要提交书面请求，由杰晟 审批。  
(A written report should be submitted to JASON FAN for approval if specifications are abnormal and deviation.)
3. 寿命测试是统计法下的一个推论值，不同于产品保证期。  
(Life test is a deductive figure under statistical method and it is different from product warranty.)
4. 安装风扇时要采取必要的预防措施。推荐使用网罩，以避免人员受伤。  
(Take necessary precaution when installing fans. Finger guards are recommended to prevent personal injury.)
5. 按照产品上标示的接线方式接入相应的电源，并正确连接接地线端，风扇运转风叶为逆时针。  
(Connect the fan to power and ground according to the wiring diagram indicated in the fan. The direction of the air is counter-clockwise seeing from front impellers.)
6. 标准环境下电容寿命 30000h, 风扇运行转速有异常, 进行电容分析。  
(The lifetime of capacitor is 30000h under standard environment; the capacitor analysis should be done if the speed is abnormal when running.)
